

# Home Energy Efficiency Tax Credits, Rebates, and Discounts

The new Federal Inflation Reduction Act provides a variety of incentives for energy efficiency updates to your home. The Act includes both tax credits and income-based rebates and discounts for the next decade on projects that make your home less drafty or improve the energy efficiency of the devices in the homes.

## Projects and devices include:

- Weatherization improvements
- Geothermal Heating
- Battery Storage Installation
- Heat Pump Air Conditioner/Heater
- Heat Pump Water Heater
- Electric Panel and Electrical Service Upgrades
- Basic Weatherization
- Whole Home Energy Reduction
- Electric Stove
- Heat Pump Clothes Dryer

**Since some of the rebates, discounts and tax credits are income-based, [Rewiring America](https://www.rewiringamerica.org/) has developed a calculator that will assist in determining eligible benefits. <https://www.rewiringamerica.org/>**
